How can you select an article based on its impact? (real or potential) Here's one method:

1. Go to the Psychology Research Guide (go/psycguide/) > Articles
2. Click on the link for Scopus
3. Enter search terms, then search
4. Now, on the results page
   a. To select an article based on the impact of the article (how many times the article has been cited)
      i. Sort on “Cited by”
      ii. Pick an article
   b. To select an article based on the impact of the journal
      i. Sort on “Relevance” (or, whatever seems most helpful)
      ii. Pick an article
      iii. Go to the “Source Details” page for the journal in which the article was published
      iv. Consider the “CiteScore”
      v. If you want to use this article
         1. Click on the link to view the rank of the journal within its category
         2. Find another journal at the opposite end of the rankings
         3. Search for an article in the other journal
